PROJECTS

WEATHER APPLICATION

- HTML, CSS, Javascript, Server-side APIs
- An application that will display the current weather and 5 day forecast of the city you are searching for.
- Learned how to fetch and display API data on an HTML page as well as utilizing local storage

THE SHEET SHOW

- Handlebars, Javascript, CSS, Restful API, MySQL
- An application for Dungeon and Dragon where one can create a character in under one minute and keep track of your character sheet.
- Learned to work in a team setting by communicating and utilizing Github features.

PURRFECT FRIEND

- HTML, Javascript, CSS, Server-side APIs
- An application to brighten your day by assorting random cat pictures and facts.
- Learn to work around the API fetched data and build an app from that data.
